

# Blanchard Equipment

## 4G MTG Upgrade Program

A 3G network shutdown is quickly approaching, so now is the time to upgrade existing 3G telematics on John Deere Equipment to new 4G technology!

Each upgrade package comes with a **4G MTG** which is equipped with a 3 year JDLINK Connect subscription.

The Modular Telematics Gateway (**MTG**) is ideally suited for advanced telematics applications such as machine health monitoring, advanced logistics, machine control, over the air programming, and remote diagnostics. It is environmentally sealed and rigorously tested to ensure long life and performance in the most demanding environmental conditions.

### So what does this mean for you as the customer?

JDLINK™ hardware, along with a JDLINK Connect subscription, makes farm management easy with a seamless and automatic flow of information to John Deere Operations Center and allows you to

- See critical and timely information about your machines, online.
- Move data to and from your machines – easily, securely, and wirelessly.
- Backup documentation and AB line to JD Operations Center.
- Enable Remote Display Access on machines for better support.

Pricing while supplies last is **ONLY \$250** AND includes Installation and Activation!

**Contact our Precision Ag team for more information.**
